TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Selenium WebDriver, TestNG, Playwright, JUnit

Developer Tools: Git, Eclipse, IntelliJ IDEA, Postman, VS Code, Jenkins, JIRA

EXPERIENCE

Correctcloud Pvt Ltd

January 2023 – Present

QA And Test Engineer

- Led the development of a comprehensive test strategy achieving **100% test coverage**, establishing a robust foundation for quality assurance processes and ensuring **maximum product reliability** across all features.
- Executed strategic enhancements that led to a **50% reduction** in the testing cycle for company products, leveraging **Fastidious test** analysis and process improvements.
- Played a pivotal role in nurturing a high-performing QA team by spearheading **automation testing** and **API testing** practices, resulting in a **30% increase** in testing efficiency and ensuring unified testing methodologies.
- Created and executed over **300 comprehensive test cases** to rigorously validate product functionality, emphasizing the use of **Selenium frameworks for automation testing within the Java environment**.
- Collaborated closely with development teams** to promptly address and resolve over **500+ identified issues**, seamlessly integrating automated testing into the development pipeline for **enhanced efficiency**.
- Maintained thorough documentation** of test plans, procedures, and results. resulting in the creation of over **100 detailed documents** to facilitate seamless collaboration and **knowledge sharing** within the team.
- Continuously evaluated and implemented cutting-edge tools** and technologies, such as **automation frameworks** and **API testing tools**, resulting in a **25% improvement in testing processes** and effectiveness.

PROJECTS

SecureAgent | *Manual Testing, JIRA, Automation Testing, Api Testing*

- Developed and conducted over **200 comprehensive test cases** for the SecureAgen Project, encompassing **regression, black box, and white box testing** methodologies.
- Deployed **automated test scripts** using Selenium WebDriver in Java to streamline testing processes and ensure **efficient regression testing**, resulting in a **40% reduction in testing time**.
- Collaborated with cross-functional teams to identify and **prioritize over 100 test scenarios**, ensuring thorough coverage of application functionalities and alignment with project objectives.
- Utilized **Jira board** to **manage 200+ test cases, track 200+ defects**, and prioritize testing activities, ensuring a **20% reduction in issue resolution time**.

Comanage360 | *Manual Testing, Automation Testing*

- Strong understanding of software development lifecycle (SDLC) processes** and methodologies, enabling effective collaboration with development teams to identify and address **75% defects early** in the development cycle.
- Worked in tandem with development teams to discern **critical test cases**, aligning them with project specifications and **user stories**, thereby ensuring 100% congruence with overarching **business goals**.
- Conducted code coverage analysis using JaCoCo to ensure comprehensive **testing of critical 95% components** and adherence to quality standards.
- Identifying, documenting, and tracking 200+ software defects** using the issue tracking system Jira Collaborating with development teams to prioritize and **resolve issues** in a timely manner.
- Integrating testing processes into **CI/CD pipelines** to automate the execution of tests whenever new code is deployed. This facilitates **early detection** of defects and ensures **95% consistent quality** throughout the development lifecycle.
- Designing comprehensive **test plans** and strategies tailored to the specific needs of the Comanage 360 project. This includes defining **testing scope, objectives, resources, and timelines**.

EDUCATION

Savitribai Phule Pune University

B TECH(INFORMATION TECHNOLOGY)

MIT ACADEMY OF ENGINEERING ALANDI PUNE

July 2016 – August 2020
